	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Collect user input through the terminal ● Save input to a CSV ● Load saved data ● View past matches and stats ● Calculate totals and averages	**Schedule - (For V2.0+)** ● Calculate streaks and advanced metrics ● Write JUnit tests to find edge cases ● Create data visualizations ● Allow the user to interact with a GUI rather than the terminal
Not Important	**Delegate - (Use a library)** ● File input/output ● GUI components ● Java Math library ● Match dates	**Delete - (Cut it)** ● Allow multiple users to log and edit stats ● Secure the application by implementing authentication ● Compare players' stats to determine the MVP
